

AON CONSTRUCTION SERVICES HELP DESK
UC.Construction@aon.com

The Regents of the University of California has engaged Aon to provide construction-related risk and insurance services. As a resource to the campuses and medical centers, Aon works closely with the Office of Risk Services to identify and address any questions or concerns regarding risks related to construction activities.

Your Aon Construction Team is here to assist you in navigating and managing the risks associated with the various phases of a construction project, from project conception through completion. We encourage UC's Facilities Management, Design and Construction and Capital Projects Teams to engage Aon to assist you in the development of risk management solutions.

Examples of areas that Aon can assist:

- Conduct construction contract review
- Review and provide recommendation on limits as prescribed by Bus-63 Exhibit D Insurance Requirements
- Applying for Builder's Risk insurance
- Enrolling contractors into the University Controlled Insurance Programs (UCIP)
- Applying for University Professional Insurance Program (UPIP)
- Assist in analyzing risks on a project and recommending risk transfer and risk control alternatives
- Review construction project environmental exposures
- Identify other insurance needs specific to a project
- Coordinate construction safety and loss control

For assistance, please email UC.Construction@aon.com or contact a team member on the Aon Construction Services Team Chart.

We look forward to serving your needs.
