

Seismic Hazard Mitigation

All free-standing partitions, bookcases, shelving, and cabinets six feet (6') or taller must be braced or anchored to prevent them from tipping over in a large earthquake. Please submit a Building Services online *iRequest* work order for this service:

<http://www.ucop.edu/facil/buildsvcs/welcome.html>

If you need assistance or have questions about specific office furnishings or equipment, please contact the Building Services Work Management Center at 987-0600.

For your own safety, maintain a seismically safe work area:

- Place large or heavy objects on lower shelves.
- Store breakables on lower shelves or inside closed cabinets.
- Keep overhead cabinets closed and latched.
- Do not place heavy artwork or other heavy objects above your desk.
